

Machine Learning Guidelines

S.no.

1	Basic definitions	Reference [2], Chapter 1, page 1-5
2	Hypothesis space and inductive bias	Reference [2], Chapter 2, section 2.1 - 2.4
3	Bayes optimal classifier and Bayes error, Naive Bayes classifier	Reference [2], Chapter 6, section 6.1, 6.2, 6.7, 6.9
4	Curse of dimensionality, dimensionality reduction, feature scaling, feature selection methods	Reference[3] Page 33-35 Reference [1], Chapter 10,
5	Linear regression with one variable, linear regression with multiple variables	Reference [1], Chapter 7, page 194-205 https://medium.com/analytics-vidhya/linear-regression-with-gradient-descent-derivation-c10685ddf0f4
6	Gradient Descent	

logistic regression, over-fitting, regularization. performance evaluation metrics, 7 validation methods	<p>1. https://towardsdatascience.com/introduction-to-logistic-regression-66248243c148</p> <p>2. https://medium.com/@shiny_jay/ml-regularization-79a081666fbc</p> <p>3. https://medium.com/@qempsil0914/courseras-machine-learning-notes-week3-overfitting-and-regularization-partii-3e3f3f36a287</p> <p>Reference [2], Chapter 8, page 52 - 60, 63 - 66</p>
8 Decision trees	Reference [2], Chapter 8, page 231-233
k-nearest neighbor	
9 classifier	
perceptron, multilayer perceptron, neural networks, back- 10 propagation algorithm	Reference [2], Chapter 4, page 81-99
Support Vector Machine (SVM),	Reference [1], Chapter 7, section 7.3 Reference [3],
11 Kernel functions	Chapter 6, page 292

- Approaches for clustering, distance metrics, K-means clustering, expectation maximization,
- 12 hierarchical clustering Reference [3], Chapter 9, page 424-426 Reference [1], Chapter 8, section 8.1, 8.5
<https://www.kdnuggets.com/2020/05/model-evaluation-metrics-machine-learning.html>
- 13 performance evaluation metrics <https://www.analyticsvidhya.com/blog/2021/05/4-ways-to-evaluate-your-machine-learning-model-cross-validation-techniques-with-python-code/>
- 14 validation methods
